

ATOM PROFESSIONAL EDGER

**Use on Sidewalks, Cart Paths, Sports Fields, Landscaping Beds & more!*

The Atom Professional/Cart Path Edger is a highly maneuverable, incredibly fast and easy to use edger designed and built by the leading edger manufacturer in Australia. Powered by the reliable 34cc Komatsu-Zenoah full crankshaft commercial 2-stroke engine, the Atom Edger is powerful enough to tackle even the most overgrown areas in just one pass. Built to commercial standards and using through hardened spring steel blades, the Atom Edger is very durable, time saving machine.

Speed, control and safety are why the Atom Professional/Cart Path Edger is so impressive. The 4-blade cutting system combined with the powerful engine gives the Atom Edger unprecedented speed – 90% faster than traditional edgers. Also, the unique wheelbarrow design means the operator has both hands on the edger at all times ensuring exact control. This design also makes the Atom incredibly maneuverable. Finally, the Safety Throttle Interlock, fully enclosed blade guard and debris deflector make the Atom the safest edger on the market.

**Edges up to 300ft/min.
or 8 Miles per Day!**

Very tough and durable!

THE NEW WIRE BRUSH BLADE

A new accessory for the Atom Professional/Cart Path Edger is a Wire Brush Blade specifically designed for edging along asphalt cart paths. With this accessory, the Atom edger quickly, safely and efficiently edges along asphalt cart paths.

The beauty of the wire brush blade is that it will quickly cut the grass yet not harm the asphalt surface. This incredibly fast machine will edge up to eight miles a day (300 ft. per minute) and the durable blade will last for 20-30 miles. No other machine is this fast when edging along asphalt.

The Atom edger comes standard with the cross-over blades system – changing over to the wire brush takes three minutes. Part Number for the wire brush blade is AT49000.
