

THE MASPORT ADVANTAGE

Specialist features make mowing so much easier!

Zone Start

Puts the starter cord within easy reach, avoiding unnecessary back strain from bending down to pull start the engine.

Vibration Resistant Design

Reduces operator fatigue.

Ergonomic Handle

Multiple height adjustment to combat back strain. Wide diameter and impact resistant soft grip for added comfort. Tapered for greater manoeuvrability around trees.

Four Stroke Technology

From the world's leading engine manufacturers, Briggs & Stratton and Honda, delivering more torque and smoother running.

Mulching

'Combo' models available

The versatile mowers that can mulch as well as catch.

Insert the mulching plug and change from a catcher mower to a mulching mower. You will save on water, fertilisers and time.

Ergo Shift®

Lever for easily lifting the mower handle, to allow easy removal of grass catcher.

Cyclo Wash

Hose fitting point on the deck to clean the housing while the mower is running, increasing the life of the deck and improving cutting efficiency.

Smartchute® versatility

The patented Masport Smartchute® will side discharge a clean spread of clippings as you mow, allowing you to mow without a catcher.

Gearbox

for self propelled mowers. Masport uses quality "General Transmission" gearboxes from France in all models except where otherwise specified.

Adjustable Wheel Bearings

Includes threaded axle and nut for ease of adjustment.

Mowzone®

The wheels are inset in some models to allow the blade to extend past the wheel, this means the model can mow right up against fences and walls. MSV®s have dual Mowzone®.

Chipperchute "patent pending"

An innovative feature that allows your mower to shred branches up to 35mm in diameter and turn them into mulch. As the branches are chipped they are fed back into the catcher so you can place the mulch back on your garden. This feature is included on all Genius models and is also available for specification on all steel & alloy products.
