

The **NEW** F-19 GEN 3

Stronger

The F-19 Gen 3 now features a Nylon injected Polymer deck that more than doubles the strength of the current deck.

Lighter

Thanks to the new Ducar DVO150 engine, the F-19 Gen 3 is 8 pounds lighter than our previous F-19.

Easier to Use

Reduced cables, easy pump for quick prime, manual choke and larger air intake gap for better air flow and float.

Ducar DVO150 Engine Highlights

- Extra tall air filter for cleaner air through the carb.
- Better oil cooling through integrated mount bracket.
- Silicon carbide pistons with high hardness – excellent wear and heat resistance.
