

ATOM PROFESSIONAL EDGER

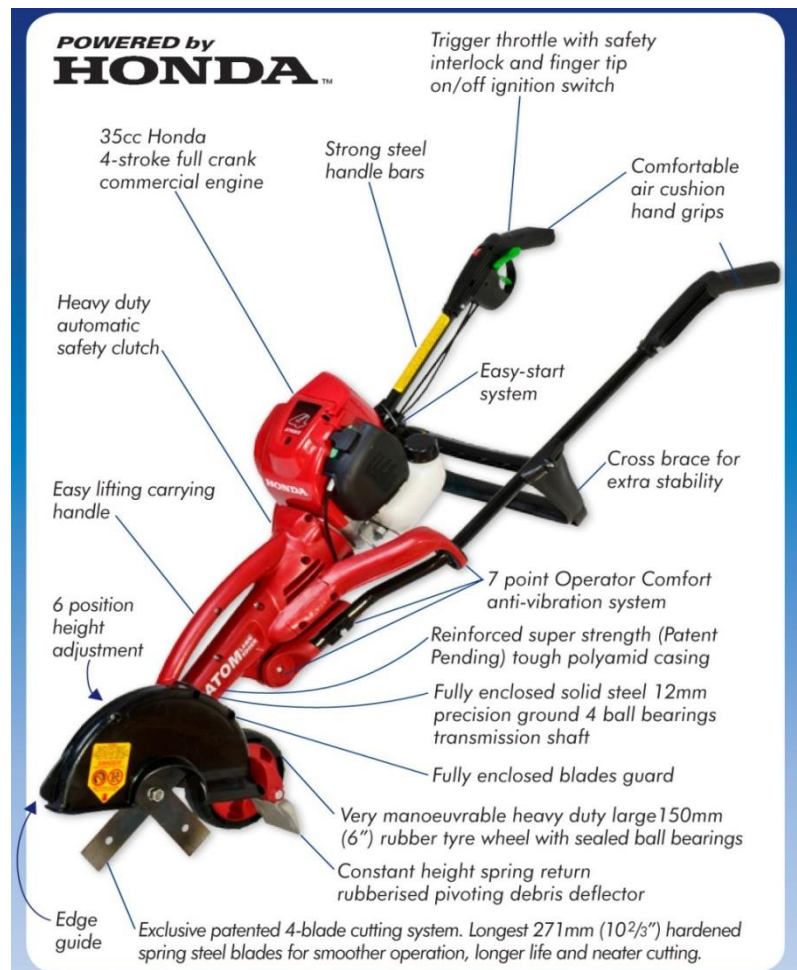

For use on Sidewalks, Cart Paths, Sports Fields, Landscaping Beds and More!

The Atom Professional/Cart Path Edger is highly maneuverable, incredibly fast and easy to use. Designed and built by the leading edger manufacturer in Australia and powered by the reliable 35cc Honda GX-35 engine, the Atom Pro Edger combines the power of a large wheeled edger with the ease of use and portability of a stick edger. Lightweight, powerful, safe and durable – Atom is the way to go.

The wheel barrow design puts the full weight of the machine on the wheel so operators are not carrying much weight and it is shaft driven so all of the engine power is delivered directly to the blades. Anti-vibration mounts, debris deflector and fully enclosed blade guard make the Atom the safest and most comfortable edger on the market today. The cross over blade system keep it on line and moving forward.

The optional wire wheel brush blade is specifically designed for edging along asphalt or for use as a crevice cleaner on most any surface.
